**The information gathered in this form may constitute personal data as defined in the Data Protection Act 1998. Any personal data will be processed in accordance with the requirements of the Act.**

### **Guidance to applicants applying for a registration certificate**

Please complete the application form using either **black** ink or type. If there is insufficient room to provide the information requested please continue on a separate sheet(s). You should also put your name and address at the top of each sheet(s) before attaching the sheet(s) to your application form.

Please contact your local licensing authority if you have any questions about completing this form or about your application.

**This form should only be used for explosives that do *not* require an explosive certificate – for example, fireworks, other pyrotechnic substances and articles, and small arms ammunition.**

The maximum quantities that can be stored under a registration are:

- 250 kilograms of small arms ammunition and percussion caps and 30 kilograms of shooters' powder;
- 250 kilograms of Hazard Type 4 explosives (eg most consumer fireworks and other pyrotechnic articles).

If you are keeping any of the more powerful Hazard Type 3 explosives then the quantities are reduced to 100 kg. If you are keeping any Hazard Type 1 explosives the quantity reduces to 30 kg.

Please seek further advice from your supplier if you are uncertain about the hazard type of the substances you wish to store.

The quantities referred to are the '**net mass**' of the explosives. This means the weight of the explosive contained within an article (ie less packaging, casings etc). In the case of fireworks and other pyrotechnic articles this is assumed to be one quarter of the gross weight of the article – unless you have more specific information from the supplier.

If the store location does not have a postal address (eg a store in a field) please include a map (1:25000) showing its location. The licensing authority may also wish to see a floorplan of the sales area if you plan to store or display more than 12.5 kg of fireworks there.

#### **Important notes**

It is your responsibility to ensure you are aware of, and complying with the regulations manufacture and storage of explosives.

The licensing authority will not normally visit your premises before granting a registration. The authority may prohibit storage of explosives at the site if it believes the site is unsafe. It may also take enforcement action if you are not storing safely.

If you are planning to sell fireworks outside certain limited periods of the year you may also need a licence under the Fireworks Regulations 2004. Your supplier or local licensing authority will be able to advise.
