

## Angus Council Report Card

### Performance Key

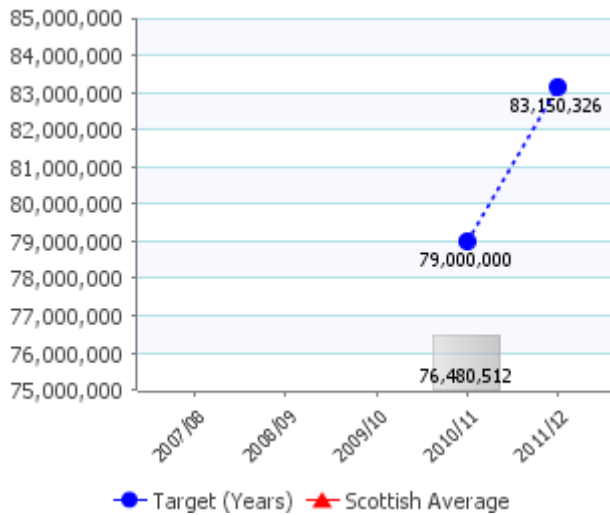

Arrows:  Better     Worse     No change     Cannot be compared

### Sustainable Development

Further information is available in:

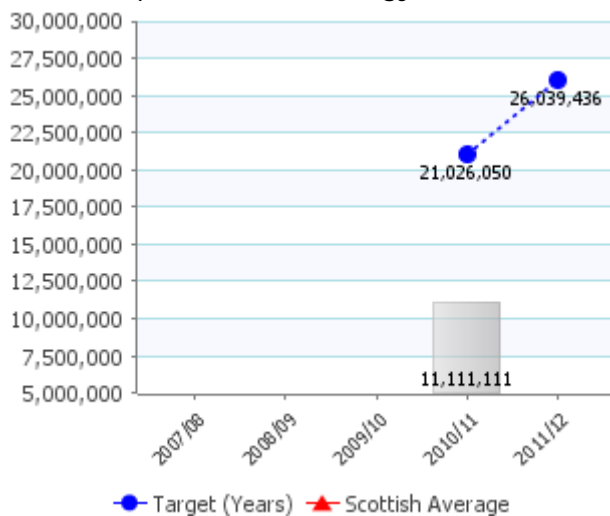

[Environment Committee Reports 2011](#)  
[Corporate Services Department Annual Report 2010/11](#)

 Energy Consumption - --ggregated amount (in kilo Watt hours per annum) of all energy sources within the CRC Scheme footprint consumed during the financial year, against budget (5 year trend)

	Value	Target
2007/08		
2008/09		
2009/10		
2010/11	76,480,512	79,000,000
2011/12		83,150,326

 CO2 Production - aggregated amount (in kilograms per annum) of CO2 production within the CRC Scheme footprint from all energy sources consumed (5 year trend)

	Value	Target
2007/08		
2008/09		
2009/10		
2010/11	11,111,111	21,026,050
2011/12		26,039,436

**?** Energy Cost – aggregated amount of expenditure on all energy sources within the CRC Scheme footprint incurred during the financial year, against budget (5 year trend)

	Value	Target
2007/08		
2008/09		
2009/10		
2010/11	£3,462,262	£3,858,000
2011/12		£3,858,123

**?** Fuel Consumption - distribution (in kilo Watt hours per annum) of all energy sources consumed during the financial year within the CRC Scheme footprint, showing the build up by energy source: Electricity (5 year trend)

	Value	Target
2007/08		
2008/09		
2009/10		
2010/11	20,654,906	20,654,906
2011/12		25,000,000

**?** Fuel Consumption - distribution (in kilo Watt hours per annum) of all energy sources consumed during the financial year within the CRC Scheme footprint, showing the build up by energy source: Gas (5 year trend)

	Value	Target
2007/08		
2008/09		
2009/10		
2010/11	39,524,590	44,492,750
2011/12		40,701,990

**?** Fuel Consumption – distribution (in kilo Watt hours per annum) of all energy sources consumed during the financial year within the CRC Scheme footprint, showing the build up by energy source: Oil (5 year trend)

	Value	Target
2007/08		
2008/09		
2009/10		
2010/11	1,666,206	1,758,865
2011/12		1,763,625

 Fuel Consumption - distribution (in kilo Watt hours per annum) of all energy sources consumed during the financial year, showing the build up by energy source: Biomass (5 year trend)

	Value	Target
2007/08		
2008/09		
2009/10		
2010/11	1,257,701	1,637,500
2011/12		1,432,544
