

Noise Management Plan

Ogilvy Bar Kirriemuir

Friday and Saturday opening till 2am.

At present we close at 1am with no issues, as over the space of time making improvements like relocating equipment and speakers and continuously monitoring sound levels.

As we would be opening till 2am there should be no issues as we would be doing exactly the same thing an hour later, also there would be no movement of people at 1am which should be an improvement as there would be an exit of people from only one premises at 2am with the surrender of Buddies license if we are granted this privilege.

We will put in place a noise management plan supervised by the proprietors. This will be in the form of regular sound checks both indoors and in the street , smokers will be guided to the back alley smoking area, security will be provided by SIA Door staff and 4 camera cctv outdoor and indoor system.

Most patrons should be already in premises by 1am eliminating any crowds at front door. Safety of our customers and staff and preventing public nuisance are a priority which is secured by having well trained bar staff and Security staff on duty with the right objectives in mind.
