

Appendix 2 : Relevant Development Plan Policies

Angus Local Plan Review 2009

Policy S1 : Development Boundaries

(a) Within development boundaries proposals for new development on sites not allocated on Proposals Maps will generally be supported where they are in accordance with the relevant policies of the Local Plan.

(b) Development proposals on sites outwith development boundaries (i.e. in the countryside) will generally be supported where they are of a scale and nature appropriate to the location and where they are in accordance with the relevant policies of the Local Plan.

(c) Development proposals on sites contiguous with a development boundary will only be acceptable where there is a proven public interest and social, economic or environmental considerations confirm there is an overriding need for the development which cannot be met within the development boundary.

Policy S3 : Design Quality

A high quality of design is encouraged in all development proposals. In considering proposals the following factors will be taken into account:-

- site location and how the development fits with the local landscape character and pattern of development;
- proposed site layout and the scale, massing, height, proportions and density of the development including consideration of the relationship with the existing character of the surrounding area and neighbouring buildings;
- use of materials, textures and colours that are sensitive to the surrounding area; and
- the incorporation of key views into and out of the development.

Innovative and experimental designs will be encouraged in appropriate locations.

Policy S6 : Development Principles (Schedule 1)

Proposals for development should where appropriate have regard to the relevant principles set out in Schedule 1 which includes reference to amenity considerations; roads and parking; landscaping, open space and biodiversity; drainage and flood risk, and supporting information.

Schedule 1 : Development Principles

Amenity

(a) The amenity of proposed and existing properties should not be affected by unreasonable restriction of sunlight, daylight or privacy; by smells or fumes; noise levels and vibration; emissions including smoke, soot, ash, dust, grit, or any other environmental pollution; or disturbance by vehicular or pedestrian traffic.

(b) Proposals should not result in unacceptable visual impact.

(c) Proposals close to working farms should not interfere with farming operations, and will be expected to accept the nature of the existing local environment. New houses should not be sited within 400m of an existing or proposed intensive livestock building. (Policy ER31).

Roads/Parking/Access

(d) Access arrangements, road layouts and parking should be in accordance with Angus Council's Roads Standards, and use innovative solutions where possible, including 'Home Zones'. Provision for cycle parking/storage for flatted development will also be required.

(e) Access to housing in rural areas should not go through a farm court.

(f) Where access is proposed by unmade/private track it will be required to be made-up to standards set out in Angus Council Advice Note 17 : Miscellaneous Planning Policies. If the track exceeds 200m in length, conditions may be imposed regarding widening or the provision of passing places where necessary.

(g) Development should not result in the loss of public access rights. (Policy SC36)

Landscaping / Open Space / Biodiversity

(h) Development proposals should have regard to the Landscape Character of the local area as set

out in the Tayside Landscape Character Assessment (SNH 1998). (Policy ER5)

(i) Appropriate landscaping and boundary treatment should be an integral element in the design and layout of proposals and should include the retention and enhancement of existing physical features (e.g. hedgerows, walls, trees etc) and link to the existing green space network of the local area.

(j) Development should maintain or enhance habitats of importance set out in the Tayside Local Biodiversity Action Plan and should not involve loss of trees or other important landscape features or valuable habitats and species.

(k) The planting of native hedgerows and tree species is encouraged.

(l) Open space provision in developments and the maintenance of it should be in accordance with Policy SC33.

Drainage and Flood Risk

(m) Development sites located within areas served by public sewerage systems should be connected to that system. (Policy ER22)

(n) Surface water will not be permitted to drain to the public sewer. An appropriate system of disposal will be necessary which meets the requirements of the Scottish Environment Protection Agency (SEPA) and Angus Council and should have regard to good practice advice set out in the Sustainable Urban Drainage Systems Design Manual for Scotland and Northern Ireland 2000.

(o) Proposals will be required to consider the potential flood risk at the location. (Policy ER28)

(p) Outwith areas served by public sewerage systems, where a septic tank, bio-disc or similar system is proposed to treat foul effluent and /or drainage is to a controlled water or soakaway, the consent of SEPA and Angus Council will be required. (Policy ER23).

(q) Proposals should incorporate appropriate waste recycling, segregation and collection facilities (Policy ER38)

(r) Development should minimise waste by design and during construction.

Supporting Information

(s) Where appropriate, planning applications should be accompanied by the necessary supporting information. Early discussion with Planning and Transport is advised to determine the level of supporting information which will be required and depending on the proposal this might include any of the following: Air Quality Assessment; Archaeological Assessment; Contaminated Land Assessment; Design Statement; Drainage Impact Assessment; Environmental Statement; Flood Risk Assessment; Landscape Assessment and/or Landscaping Scheme; Noise Impact Assessment; Retail Impact Assessment; Transport Assessment.

Policy SC2 : Small Sites

Proposals for residential development on small sites of less than 5 dwellings within development boundaries should provide a satisfactory residential environment taking account of the following:-

- compatibility with established and proposed land uses in the surrounding area;
- plot sizes compatible with those in the area;
- provision of at least 100m² private garden ground ; and
- maintenance of residential amenity and privacy of adjoining housing.

Proposals will also be required to take account of the provisions of Policy S6 : Development Principles.

Policy SC14 : Villa Property

Development proposals for new residential development within the garden ground of stone-built villa properties within development boundaries will only be acceptable where:-

- the development (including roads and driveways) does not damage the character and appearance of the existing property and/or the surrounding area;
- the proposal respects the density, scale, form, siting, orientation and materials of existing buildings;
- development does not result in the unacceptable loss of important trees;
- car parking and garaging are unobtrusively sited; and
- the proposal complies with other relevant policies of this Plan.

Development proposals involving the change of use of villa property which would adversely affect the residential character of the surrounding area or significantly impact on the amenity enjoyed by adjoining properties, will not be permitted.

Policy ER6 : Trees, Woodlands and Hedgerows

Trees, woodlands and hedgerows which have a landscape, amenity and/or nature conservation value will be protected from development. Development that would result in the loss of or damage to ancient or semi-natural woodlands will not be permitted. Tree Preservation Orders will be promoted to protect groups of trees or individual significant trees of importance to the amenity of a surrounding area where such trees and woodland are under threat. Management Agreements will be introduced, where appropriate, to ensure the establishment of new and replacement planting. Tree planting initiatives such as Community Woodland proposals and other amenity planting will continue to be supported and encouraged.

Policy ER7 : Trees on Development Sites

Planning applications for development proposals affecting sites where existing trees and hedges occur and are considered by Angus Council to be of particular importance will normally be required to:

- (a) provide a full tree survey in order to identify the condition of those trees on site;
- (b) where possible retain, protect and incorporate existing trees, hedges, and treelines within the design and layout;
- (c) include appropriate new woodland and or tree planting within the development proposals to create diversity and additional screening, including preserving existing treelines, planting hedgerow trees or gapping up/ enhancing existing treelines.

In addition developers may be required to provide an Arboricultural Methods Statement, a Performance Bond and/or enter into Section 75 Agreements.
