

# The Glens - Areas of identified need mapping exercise October 2020

Total number of identified areas of need by category

## Data

**Fifth five** women were identified as part of the mapping exercise undertaken in the women project of Justice Services in Oct 2020. Identified need and location were collated into the following charts to better understand potential differences in area of need and location.

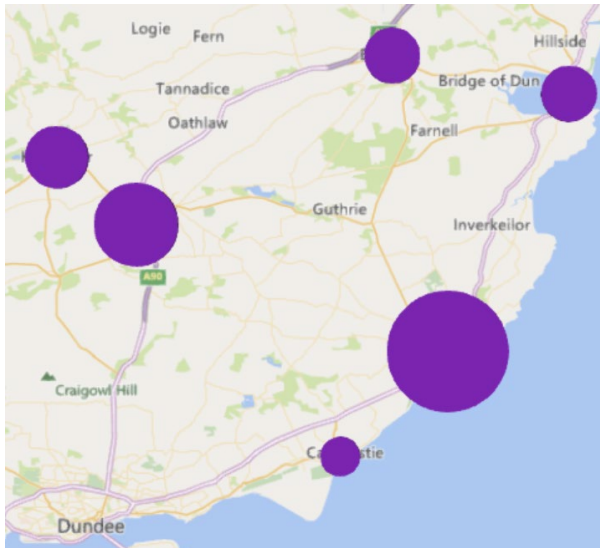

There were **208** separate areas of need identified for the **55** women. Managing mental health, stress and/or anxiety were the most identified areas of need for **43** women or **78.2%**. Pregnancy needs had the fewest recorded needs of the 55 women with **2** or **3.6%** being identified as having this need.

Areas of identified need by location

## The Glens - Areas of identified need mapping exercise October 2020

Number of women by location

More women located in **Abroath (82.6%)**, **Kirriemuir (100%)**, **Brechin (80%)** and **Carnoustie (100%)** were identified as having areas of need in mental health, stress and/or anxiety compared to women located in **Forfar (64.3%)**, **Montrose (66.6%)**. Overall, as mentioned this was the most identified need of all the categories.

The map graphic shows the distribution on women based on post code town. The larger the dot the more women.

Number of women with identified area of need in managing mental health / Stress / anxiety

## The Glens - Areas of identified need mapping exercise October 2020

Number of women with identified area of need in managing their emotions and behaviours

Managing emotions and behaviours was the **second** area of most identified need in all women, **34** or **61.8%**. **Forfar** (71.4%), **Kirriemuir** (80%), **Brechin** (60%) and **Abroath** (56.5%) saw more women who were identify with this need compared to those who lived in **Montrose** (50%), or **Carnoustie** (50%).

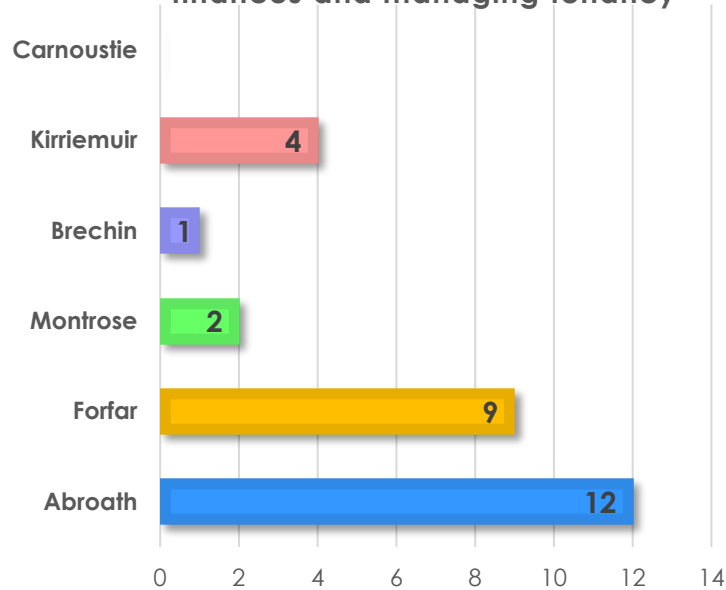

Keeping busy and active is the **third** area of most identified need in all women, **33** or **60%**. **Carnoustie** (100%), **Kirriemuir** (100%), **Montrose** (66.3%) saw more women who were identify with this need compared to **Forfar** (57.4%), **Abroath** (56.5%) and **Brechin** (20%).

Number of women with identified area of need in keeping busy and active

## The Glens - Areas of identified need mapping exercise October 2020

### Number of women with identified area of need in addiction and substance use

Addiction and substance use are the **sixth** areas of most identified need in all women, **23** or **38.2%**. **Kirriemuir** (100%), **Forfar** (42.8%), and **Montrose** (33.3%) saw more women who were identify with this need compared to those who live in **Arbroath** (30.4%), **Brechin** (20%) or **Carnoustie** (0%).

Parenting support is the **third least** area of most identified need in all women, **14** or **25.5%**. **Carnoustie** (50%) and **Montrose** (33.3%), **Arbroath** (30.4%) and **Forfar** (28.6%) saw more women who were identify with this need compared to those who live in **Brechin** (0%) or **Kirriemuir** (0%).

### Number of women with identified area of need in parenting support

## The Glens - Areas of identified need mapping exercise October 2020

Keeping safe, at risk of exploitation and social media was the **second least** areas of most identified need in all women, **8** or **14.5%**. **Forfar (35.7%)**, and **Kirriemuir (20%)** and **Montrose (16.7%)** and saw more women who were identify with this need compared to those who live in **Arbroath (4.3%)**, **Brechin (0%)**, **Carnoustie (0%)**.

Pregnancy needs was the **least** area of most identified need in all women, **2** or **3.6%**.

Due to the increased potential for identification with low numbers of individuals involved, the location of these women has been omitted from this report.

Percentage of women identified with pregnancy needs

## The Glens - Areas of identified need mapping exercise October 2020

### Summary

- **Arbroath** – Had the most women numerically and had a percentage of women who identified in all areas including 'other' (sexual health). Finance and tenancy (52%) / mental health, stress and/or anxiety (83%) were the two where the majority of women were identified as having these needs.
- **Forfar** – Women located in Forfar had higher percentages of need identified in keeping safe / risk of exploitation / social media (36%) / finance and tenancy (64%) and managing emotions and behaviours (71%).
- **Montrose** – With a smaller number of women located in Montrose there were still women who identified in all but one of the identified needs areas. Managing relationships and domestic abuse (83%) were the identified need most identified by women in Montrose.
- **Brechin** – With a similar overall number of women to Montrose, Brechin had more women who were identified as having needs in managing relationships and domestic abuse (60%) / managing emotions and behaviours (60%) and mental health, stress and/or anxiety (60%).
- **Kirriemuir** – Women in Kirriemuir although less in number (similar to Montrose and Brechin in number) Finance and tenancy (80%) / addiction and substance use (100%) / managing relationships and domestic abuse (60%) / keeping busy and active (100%) / managing emotions and behaviours (84%) / mental health, stress and/or anxiety (100%) were some of the highest percentages seen by all women from a particular area for most of the categories of need areas.
- **Carnoustie** – Parenting support (50%) / keeping busy and active (100%) / mental health, stress and/or anxiety (100%) were the areas of identified need most identified for women in Carnoustie.

N.B Due to the numbers involved making generalised statement should be taking with some caution when inferring trends. The percentages have been calculated with the number of women from the location areas as supposed to the division between identified needs.
