

Appendix 3 – Relevant Development Plan Policies

Angus Local Development Plan 2016

Policy DS4: Amenity

All proposed development must have full regard to opportunities for maintaining and improving environmental quality. Development will not be permitted where there is an unacceptable adverse impact on the surrounding area or the environment or amenity of existing or future occupiers of adjoining or nearby properties.

Angus Council will consider the impacts of development on:

- Air quality;
- Noise and vibration levels and times when such disturbances are likely to occur;
- Levels of light pollution;
- Levels of odours, fumes and dust;
- Suitable provision for refuse collection / storage and recycling;
- The effect and timing of traffic movement to, from and within the site, car parking and impacts on highway safety; and
- Residential amenity in relation to overlooking and loss of privacy, outlook, sunlight, daylight and overshadowing.

Angus Council may support development which is considered to have an impact on such considerations, if the use of conditions or planning obligations will ensure that appropriate mitigation and / or compensatory measures are secured.

Applicants may be required to submit detailed assessments in relation to any of the above criteria to the Council for consideration.

Where a site is known or suspected to be contaminated, applicants will be required to undertake investigation and, where appropriate, remediation measures relevant to the current or proposed use to prevent unacceptable risks to human health.

Policy TC4: Householder / Domestic Development

Proposals for householder development (including alterations/extensions to houses and flats, development within the curtilage of houses and flats, means of enclosure, satellite antenna and domestic scale microgeneration) will be supported where the siting, design, scale or massing of the proposal, does not:

- adversely affect the residential amenity enjoyed by the house or surrounding domestic properties including, in the case of microgeneration, through noise or shadow flicker;
- detrimentally affect the character and/or appearance of the building, site or surrounding area; and
- result in the overdevelopment of the plot or a loss of garden ground, parking or bin storage.

Further guidance on householder development will be set out in a Householder Development Planning Advice Note.
