1.0 Introduction

Under the Public Records (Scotland) Act 2011 (PRSA) named public authorities across Scotland, including Angus Council (the council) and Angus Licensing Board (the board), are required to put in place appropriate records management arrangements by producing and implementing a Records Management Plan (RMP). These arrangements will show effective, efficient and systemic control of the creation, storage, retrieval, maintenance, use and disposal of records including processes for capturing and maintaining evidence. This systemic management of records is particularly significant because it will allow the organisations to:

- increase efficiency and effectiveness
- make savings in administration costs, both in staff time and storage
- support decision making
- be accountable
- achieve business objectives and targets quicker
- provide continuity in the event of a disaster
- meet legislative and regulatory requirements
- protect the interests of employees, residents and stakeholders

Angus Licensing Board is administered by Angus Council staff. In the interests of making this document more readable, references to the council should be taken as including the board wherever appropriate.

The extent of the RMP includes the management framework, policies, procedures, record management systems, technologies and tools employed within the organisation to ensure that its records are managed effectively and efficiently to be in compliance with legislation as well as satisfying business needs. This document summarises each of the elements of the PRSA and provides evidence of records management arrangements that are in place demonstrating compliance with the PRSA. This includes both corporate evidence, such as policies, procedures, standards and where applicable local application of these.

An Improvement Plan, attached to this RMP, incorporates actions for improvements. Progress in addressing these actions will be monitored by the Information Governance Steering Group.

For more information about the Public Records (Scotland) Act 2011, visit the website of the National Records of Scotland:

<https://www.nrscotland.gov.uk/record-keeping/public-records-scotland-act-2011>

A copy of the Act can be viewed online via the National Archives

<http://www.legislation.gov.uk/asp/2011/12/part/1/enacted>

2.0 Structure of the Evidence List

The Evidence List identifies evidence that supports the council's RMP. Some documents are used as evidence in more than one element. To minimise duplication, only one copy of each document will be held on file. The list of evidence submitted with this RMP has been annexed as [Annex A](#).

3.0 Statement of Compliance

Element 1: Senior management responsibility

The Chief Information Governance Officer for records management is:

Jackie Buchanan
Director Legal and Democratic
Angus House
Orchardbank Business Park
Forfar
DD8 1AN
Telephone 01307 492546

The Chief Executive and the Chief Information Governance Officer fully endorse this plan and will ensure that the required improvements to records management principles and procedures are implemented corporately and in an effective manner.

On 1 December 2015 the ANGUSalive trust assumed responsibility for the management and operation of a range of community facing sport, recreation, arts, heritage, archival and library services. By letter signed 26 June 2016 the trust agreed to comply with the PRSA in that they fully endorse the Records Management Plan submitted for approval.

ANGUSAlive is the only external organisation to whom Angus Council has formally outsourced a complete function. Any other contracting is for the provision of specified goods, works and services, albeit that some of these (e.g. care) are for consumption by the public directly. The council's standard conditions of contract include a section on data protection, access to and provision of information', (section 16 in the conditions for the provision of services) see link provided.

http://www.angus.gov.uk/info/20386/procurement/625/general_conditions_of_contract

Future Developments

Any further changes going forward will be reflected in policies and procedures.

Assessment and Review

This element will be reviewed in the event of any relevant change in personnel, roles and/or responsibilities.

Responsible Officer

Margo Williamson, Chief Executive

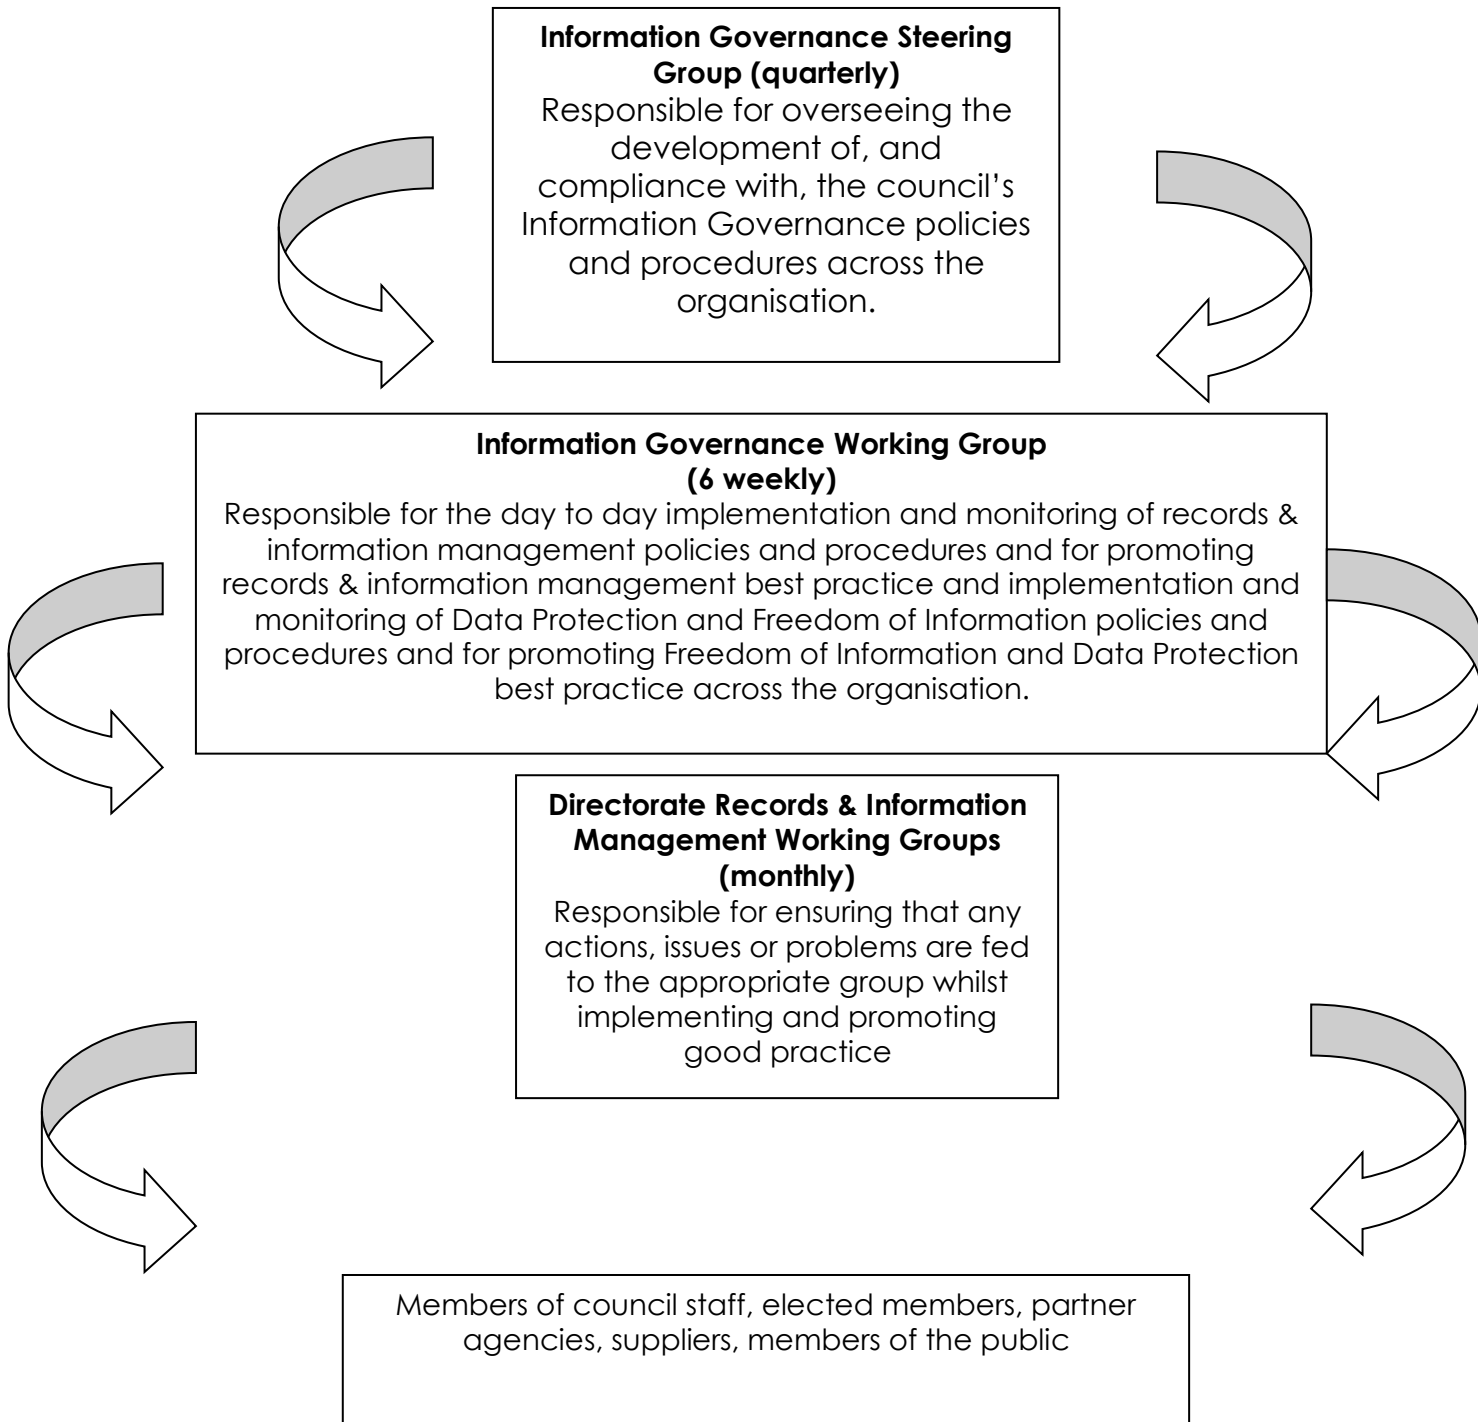

Evidence of Compliance Element 1

Item 01 Statement from Chief Executive of Angus Council

Item 02 Statement from Chief Information Governance Officer of Angus Council

Item 03 Statement from Chief Executive of the ANGUSalive trust

The reporting structure is detailed below. The Information Governance Steering Group is chaired by Jackie Buchanan, (Chief Information Governance Officer), Director Legal and Democratic. Alison Watson sits on both the Information Governance Steering Group and the Information Governance Working Group and is the council Data Protection Officer. The Team Leader Information Governance chairs the Information Governance Working Group and staff who sit on these groups in turn chair the directorate working groups. This two-way flow of information up and down the organisation is critical to the success of information governance. These groups meet on a regular basis.

Assessment and Review of the RMP

These groups shall review the RMP on a regular basis with a formal review being carried out on an annual basis. This structure and reporting process will be reviewed in the event of any relevant change in personnel, roles and/or responsibilities, structures or legislation.

In March 2017 an [Assessment Report](#) was submitted by The Keeper of the Records of Scotland (the Keeper). Actions within the report will be updated and evidence of action updates will be submitted to the Keeper on a regular basis.

Element 2: Records Manager responsibility

The individual answerable to senior management within the council and who has operational and day-to-day responsibility for records management is:

Angela Dunlop
Team Leader - Information Governance
Legal and Democratic
Angus House
Orchardbank Business Park
Forfar
DD8 1AN

On records management issues Angela Dunlop reports to Alison Watson, Service Leader - Legal and Democratic or Jackie Buchanan as Chief Information Governance Officer.

Future Developments

Any future changes relating to this element will be published and included in the Improvement Plan as appropriate.

Assessment and Review

This element will be reviewed in the event of any relevant change in personnel, roles and/or responsibilities.

Responsible Officer(s)

Jackie Buchanan - Legal and Democratic

Evidence of Compliance Element 2

Item 01 Statement from Chief Executive of Angus Council
Item 02 Statement from Chief Information Governance Officer of Angus Council
Item 03 Statement from Chief Executive of ANGUSalive
Item 04 Team Leader - Information Governance Job Profile

Element 3: Records Management Policy Statement

A consolidated Records Management Policy, reflective of the recordkeeping arrangements in place for the council as a whole, was approved by the Information Governance Steering Group on 21 September 2015 and has been reviewed annually thereafter. The Policy document sets out the principles and the responsibilities of information management in the council that are key to records management.

The purpose of the Records Management Policy is to define the framework by which information held by the council is managed in compliance with legislation and according to clearly defined procedures and controls governing the creation, indexing, storage, publication, use, retrieval, revision, retention and disposal of information, whatever its format. The Records Management Guidance document provides context and further information to support the implementation of the council's Records Management Policy.

The Policy and guidance have been published on the council's intranet and communicated to the Information Governance Working Group for cascading to services. Angus Council's Records Management Policy is publicly available on the authority's website [Records Management Policy](#).

The council is concentrating on getting records management processes in place, in order to provide a strong records and information management culture across the council. All areas within the council are working together to ensure that this will be the case and ongoing work relating to this is included in the Improvement Plan.

Future Developments

The council are moving to introduce Office 365 and records currently sitting on servers will be moved over from servers to the Office 365 platform. The Team Leader – Information Governance will be involved in the development of this work ensuring there will be the capability to integrate retention schedules to information being moved into the new platform.

Records management is referred to in the council's e-learning course for Information Governance. Data Protection e-learning is mandatory for current staff (to be completed annually) and is included in the induction process.

Assessment and Review

The Records Management Policy will be reviewed as required and also after each major business or technological change such as any programme, project or initiative that might affect the content of the policy therein. Other supporting guidance and procedures will be reviewed on an ongoing basis as stipulated by the Information Governance Steering Group, or whichever body replaces this group in the future.

Responsible Officer(s)

Angela Dunlop, Team Leader - Information Governance

Evidence of Compliance Element 3

Item 05 Screen Dump AC Intranet Information Governance

Item 06 Information Governance Improvement Plan

Item 52 Records Management Guidance

Element 4: Business classification

The council is aware of its statutory functions and what business areas exist to administer these functions, details can be found on the angus.gov.uk website [classes of information](#).

Work is required to identify where and what types of information is routinely being created. With this in mind, the council has agreed to adopt the Local Government Classification Scheme (LGCS) as a guide for the development of its business classification scheme. The scheme is developed in a structure that supports the business activities of the authority.

The LGCS was developed by the Information and Records Management Society.

Future Developments

The council is at the very early stages of developing and implementing a business classification scheme (BCS) and this work will be systematically done in services undertaking records management projects. Services are currently working on Information Asset Registers (IAR). The IARs will allow clear identification of where and how business critical vital information assets are held. Alignment of information assets will identify core functions using the corporate BCS.

Work is currently underway in different services to get their file plans in line with the council's classification scheme and work for this is reflected in the Improvement Plan. Senior managers are aware of their commitment to making this improvement and evidence of this can be found in various formats including minutes of meetings from all levels in the structure, covalent actions and emails to senior members of staff reminding them of their responsibilities.

An agreed classification scheme will be considered before services migrate any information from shared drives to Office 365. These developments will ensure that the classification structure remains intact with only authorised staff able to make approved changes to any part of the scheme.

Assessment and Review

Once the actions on this element have been completed, an assessment and review procedure will be developed and cascaded to all services within the council, for example, assessment and review will take place if there is a change in the council structure or business function. The BCS implementation and review will continue to be an action in Pentana and will be reviewed in line with the Information Governance Improvement Plan.

Responsible Officer(s)

Jackie Buchanan Director - Legal and Democratic

Evidence of Compliance Element 4

Item 04 Screen Dump AC Intranet Information Governance

Item 07 Screen Dump Covalent actions BCS

Item 06 Information Governance Improvement Plan

Item 08 Extracts from Minutes

Item 09 Business Classification Email sent to Senior Managers

Item 53 Angus Council Classification Scheme

Element 5: Retention schedules

The council has adopted the Scottish Council for Archives Records Retention Schedule (SCARRS) model. This applies to both electronic and paper records. More detailed retention schedules, based on SCARRS, have been developed by some services but it is recognised that any changes to the SCARRS retention schedules need to be signed off by senior managers.

More information on SCARRS can be found on the Scottish Archives website: <http://www.scottisharchives.org.uk/scarrs>.

Application of retention schedules is taking place in the EDRMS software IDOX. Retention schedules are created within a category, based on various rules and each category may have a number of rules that apply under different circumstances. Documents which meet the retention expiry dates based on these rules appear daily in the retention area and from here they can be deleted, reviewed, etc. depending on the rules assigned to them.

For records of historical value, these are transferred to the council's Archive Service.

Contracts are in place with third party organisations to enable paper records to be scanned onto DVD, CDs, pen drives and external hard drives and thereafter destroyed securely.

Future Developments

Whilst SCARRS retention schedules, or schedules agreed and approved by individual services, have been adopted, and have been applied to all hard copy documents, it is recognised that improvement are still required to be made for information held within shared drives and business systems. This remains an item on the Improvement Plan.

A great deal of work is being carried out to promote records management practices, with regular events being held throughout the year as well as the encouragement of day-to-day cleansing of records. That said, there is always room for improvement, and this shortcoming has been identified and highlighted within the Improvement Plan attached to this document.

Assessment and Review

Work in relation to the review of existing policies, and development of new policies, if required, will be monitored through the Information Governance Steering Group.

Item 11 Contract Clyde Document Imaging Limited
Item 12 Procurement Document Management
Item 06 Information Governance Improvement Plan
Item 13 Events Supporting Clear Desk - Ditch the Data – Olympic
Challenge
Item 14 Archive and Transfer Arrangements

Element 6: Destruction arrangements

As alluded to in Element 5 the council has in place arrangements to destroy records that have been identified for destruction. The council does hold legacy files and are destroying these records in line with SCARRS and services' retention schedules and this is work in progress across the authority.

Destruction certificates are created by staff but final approval is sought from an authorised member of staff, either the owner of the records or a senior manager.

Paper Records

For paper records the council use Shred-it for the secure on-site destruction of confidential files.

Company website: <http://www.shredit.co.uk/en-gb/home>

Locked consoles are placed at specific locations in the offices for staff to place documents requiring secure destruction. Contents of consoles are regularly collected by Shred-it staff and destroyed on, or very close to, the council premises. Shred-it also deals with other media such as Tapes (Video, Audio, and Data) Microfiche, CDs/DVDs.

Paper not requiring secure destruction is deposited in blue recycling bins placed throughout council buildings.

The council does not use a commercial storage facility for holding records offsite.

Electronic Records

The council's corporate data is backed up on a nightly basis using an automated process of incremental backups within the CommVault backup tool. Backups are overwritten after 35 days.

With the exception of IDOX, there is no automated procedure for destruction and no automatic link to a retention schedule. There is no centralised control over information stored on / deleted from shared drives; responsibility lies with individual services. The Team Leader - Information Governance is using Treesize to identify documents on servers which have exceeded their retention period. These reports are then shared with managers in an effort to get a better understanding of what is being held on servers and by whom. Further information around the Treesize application is attached. Work is still required in this area and this is included in the Improvement Plan attached.

Hardware

All hardware is securely disposed of by CNS, Dundee. This includes the cleansing and destruction of hard drives.

Future Developments

Standards of records destruction arrangements in line with the provisions of the PRSA, where applicable, will be built into business processes, contracts and agreements with third parties who handle or process records on the council's behalf.

Work will continue to identify documents on servers which have exceeded their retention period.

A retention and disposal facility will be included as part of requirements specifications for new systems (or upgrades to existing systems) that are procured, and again this is included in the Improvement Plan attached to this document. It is intended that this work should resolve the current shortcomings.

Assessment and Review

This element will be reviewed by the Information Governance Steering Group, or whatever body replaces this group in the future, or as required following any incident.

Responsible Officer(s)

Item 18 Certificate of Destruction - ShredIt
Item 19 Hardware Contract data CRS
Item 20 Screen Dump Treesize report
Item 05 Screen Dump AC Intranet Information Governance
Item 06 Information Governance Improvement Plan
Item 60 Treesize evidence for RMP

Element 7: Archiving and transfer arrangements

In 2005 the Archive Service for the council relocated to the Hunter Library nearby the Restenneth Priory, which is an ancient priory church believed to have been founded by Nechtan, King of the Picts in 715. More information on the Archives Service is available on the ANGUSalve website: <http://archive.angus.gov.uk/historyaa/archives/>.

A procedure is in place for staff to transfer or access documents from the Archive Service.

There is a basic transfer form to record an initial record transfer, regardless of source. It is then entered in the day book, before being processed, numbered and added to the CALM database.

There are old paper lists for what has been transferred from Angus Council and Angus District Council. The current versions are embedded on the CALM database but it illustrates some of what is being archived.

During physical clear-outs of identified storage areas and offices, the Senior Archivist is contacted to review records identified as presenting potential historical interest. Selected records are then transferred to the Archive Service. The council will continue to, in collaboration with the archive service, identify records suitable for permanent preservation and ensure safe transfer at the end of their business life to the archive service.

[Angus Archives collections care and conservation plan](#) has now been developed.

Future Developments

Any future changes relating to this element will be reflected in policies and procedures and shared with council staff as appropriate.

Assessment and Review

This element will be reviewed in the event of any future changes around the charitable trust and the Information Governance Steering Group, or whatever body replaces this group in the future, or as required following any incident.

Responsible Officer(s)

Fiona Dakers, Senior Manager – Libraries, Customer & Culture, ANGUSalve

Fiona Scharlau, Archives Manager, ANGUSalve

Jackie Buchanan, Director - Legal and Democratic

Angela Dunlop, Team Leader - Information Governance

Evidence of Compliance Element 7

Item 21 Transfer to Angus Archives Form

Item 22 Archived Angus Council Records
Item 23 Archived Angus District Council Records

Element 8: Information security

The council has an Information Security Policy and all staff are required to comply with the Policy which is supported by a comprehensive set of complementary policies, and guidance documents.

[Financial Regulation 25.4](#) outlines responsibilities for information security. This is supported by more detailed policies and guidance available on the intranet, including the Information Security Policy, the Information Technology (IT) Security Policy and Information Security User Guidelines.

Regulation 25.4 was revised to refer to all information held, and not just IT related information.

Paper records

Current paper records are stored close to staff requiring access to them in dedicated storage equipment in offices, such as filing cabinets, filing rooms, mobile racking and tambour cabinets. Some centralised filing systems have file trackers to monitor who has taken a file out of the cabinets.

The council operates a clear desk policy. Paper files must be locked away when not in use. The Physical Files Policy gives staff instructions for dealing with paper records in and out of the office.

Electronic Records

The council is PSN compliant (compliance certificate attached as evidence). The council requires that encryption is in place where personal, sensitive or confidential information is stored. All mobile devices must be encrypted.

Electronic records are managed, as far as possible, in accordance with the lifecycle principles applied to the management of paper records. Electronic records are part of the information resources for all council services and include records held within document management systems and shared drives.

All new document management systems used by the council must include electronic records management functionality and be capable of providing for the archiving of electronic records.

Information security is covered through the elearning courses, Data Protection and Information Governance. Both courses are part of the council induction process and the Data Protection elearning course is a mandatory course which staff are required to carry out annually. .

Future Developments

Any further future changes relating to this element will be reflected in policies and procedures and shared with council staff as appropriate.

Assessment and Review

This element will be reviewed by the Information Governance Steering Group, or whatever body replaces this group in the future, or IT staff as appropriate. Information security may be subject to audit as part of annual audit plans. Two audits were completed as part of the 2015/16 Internal Audit Plan. See attached evidence.

Item 63 Information Security – User Guidelines

Element 9: Data Protection

In order to deliver services to the various communities in Angus, the gathering and processing of personal data about residents, staff and other individuals is necessary. The council has a legal obligation to comply with the requirements of the Data Protection Act 1998, ("the Act") in relation to the management, processing and protection of personal data and sensitive personal data as defined in the Act. The council's data protection practices demonstrate the organisation's commitment to compliance with the Act and the safeguarding and fair processing of all personal data held. The council is listed on the Data Protection Register of Data Controllers held by the Information Commissioner's Office. An online training course is provided to all staff in order to ensure that they are aware of their responsibilities in managing, processing and protecting personal data. This training was made mandatory for all staff and the training is via an on-line course with a short test. Staff undertake this e-learning training at induction and annually thereafter.

The council's registration number in the Data Protection Register is Z4842744. This registration includes "Licensing and Regulatory activities" and thus incorporates the activities of the board. This can be viewed on the Information Commissioner's website, www.ico.org.uk.

New data protection training was developed to take into account new GDPR requirements. This also assisted with keeping the information up to date and relevant.

Future Developments

Any further future changes relating to this element will be reflected in policies and procedures and shared with council staff as appropriate.

Assessment and Review

Policies will be reviewed as stipulated by the Information Governance Working Group, or whichever body replaces this group in the future, ensuring they remain accurate and up to date. The Data Protection register entry will be renewed in April 2019 and regularly monitored and updated as necessary.

Evidence of Compliance Element 9

Item 31 Screen Dump AC Intranet Data Protection Guidance
Item 28 E-Learning Data Protection and Handling Information Correctly
Item 55 Data Protection "Guide for Employees"
Item 56 Data Protection Leaflet for Employees

Element 10: Business continuity and vital records

The council has a number of Business Continuity Plans (BCPs) and procedures in place which are reviewed regularly and updated as required. BCPs are subject to regular annual review by business continuity co-ordinators in each service that have been identified and trained. In addition the council's strategic business continuity action plan, which refers to the operational plan, and a full training and exercising plan is managed by the council's resilience manager and submitted to the council's management team.

All business continuity plans are submitted on the agreed template and quality assured against ISO 22301 at the outset, which provides a standardised and consistent approach to assessment of all plans. On completion of the initial plan, it is tested and exercised to ensure staff are familiar with the content and that the plan is fit for purpose, with full exercise reports provided. Further testing and exercising is then undertaken over a three year cycle as part of the training and exercising plan.

Future Development

Any future changes relating to this element will be reflected in policies and procedures and shared with council staff as appropriate.

Assessment and Review

BCPs are subject to regular review through the council's management team and the resilience manager. Business continuity may be subject to audit as part of annual audit plans. The most recent audit was completed as part of the 2015/16 Internal Audit Plan.

Responsible Officer(s)

Item 34 Risk Management Strategy 2016
Item 35 Internal Audit 15-16 Business Continuity Planning
Item 36 Business Continuity Plan - Property
Item 37 Business Continuity Plan – Schools
Item 57 Corporate Business Continuity action plan

Element 11: Audit trail

The council has a number of systems, which are used to store information. Most of these systems are integral to business systems and are used to store information generated by that system. The three main document/records management systems are IDOX, SharePoint and Civica. The systems are used in various ways to store and manage individually created documents/records.

Where an EDRMS is in use, the system provides electronic audit trail and version control as evidence of saving, modifying and deletion of records.

Archiving procedures ensure that paper records are tracked from local storage to long term archive preservation within the Archivist Service.

The council has a Physical Files Policy and examples of procedures required to meet the policy include: within legal, paper files have a check out card which must be signed by the person removing the file so that it is clear who has removed the file and when it is returned. Also within our staffing and payroll section there is a system in place for the moving around of staffing files, and within schools there is a process for moving pupil files. See evidence below.

In the past, staff were unsure of the use and importance of metadata and a guidance note has been placed on the Guidance Notes area of the Information Governance SharePoint area which is open to all staff.

The Records Management Policy, Naming Convention Guidance and the use of metadata was addressed in the records management training.

Future Developments

Any future changes relating to this element will be reflected in policies and procedures and shared with council staff as appropriate. The authority believes that the introduction of Office 365 will be instrumental in being able to audit the trail of and destruction of electronic records. The Team Leader – Information Governance will work closely with IT colleagues in the development or implementation of Office 365 to ensure the audit trail for records will be switched on – where appropriate in Office 365.

Assessment and Review

This element will be reviewed by the Information Governance Steering Group, or whatever body replaces this group in the future, or IT staff as appropriate

Item 59 Audit Trail Civica System

Element 12: Competency framework for records management staff

The council recognises that records management is an entirely separate function from general office duties and acknowledges the importance of records management principles and practices. Senior management recognise the importance of the continued development of staff with records management responsibilities within services and is open to staff attending regular seminars and conferences for continuing professional development (CPD). This is mainly achieved by staff attending various conferences organised by the Information and Records Management Society (IRMS) amongst others. There are many opportunities offered to the Team Leader - Information Governance- as listed in evidence provided.

The council currently provides corporate support across the organisation on managing electronic and hard copy records through various e-learning courses and provides information on the council intranet in accordance with its business requirements and the council's responsibilities under the PRSA.

The council are looking to include further corporate training for records management to be made available on the council's learning and development site and this is included in the Improvement Plan attached to this document.

Future Developments

A compilation of online training courses will be provided for council staff to ensure consistency and accuracy with regard to records and information management across the organisation. The Team Leader - Information Governance will continue to attend events relating to information governance and PRSA etc.

Assessment and Review

The Information Governance Working Group will regularly review the requirements for records and information management training once a suite of core courses have been created.

Item 28 Screen Dump E-Learning Handling Information Correctly and E-Learning Information Governance
Item 42 Screen Dump E-Learning Using the Council's IT systems

Item 06 Information Governance Improvement Plan

Element 13: Assessment and review

The council will review the plan regularly to ensure that the provisions contained in it remain fit for purpose. The format for assessing and reviewing the plan will be determined by the Information Governance Steering Group. Review and will be led by the Chair of the Information Governance Steering Group at the time. Please see Element 1 for reporting and review structure.

An Improvement Plan has been attached to this document and it will help in the review of the relevance of the RMP. This information will be provided to the various Heads of Service within the council for monitoring purposes.

Information governance topics are considered for inclusion in the annual risk-based internal audit plan. An Information Governance section has been added to the corporate governance questionnaire which is issued annually to directorates.

Assistance will be offered to services where records management advice is required.

Future Developments

A self assessment on compliance with PRSA, both corporately and for services is to be developed and put in place with appropriate responsibilities and reporting. The Internal Audit Service may be notified if major issues with non-compliance are found.

The Information Governance Steering Group is taking on the responsibility of monitoring the development of the RMP and compliance with the Improvement Plan.

Assessment and Review

The assessment and Review process will be agreed and then reviewed by the appropriate body on a yearly basis.

Item 43 ARMS Toolkit registration

Item 06 Information Governance Improvement Plan

Element 14: Shared Information

A General Data Sharing Protocol supported by Individual Protocols was first developed as part of the Joint Future Initiative. Parties to the Protocol are NHS Tayside, Perth & Kinross Council, Dundee City Council and Angus Council. The protocol has been further developed following the recent Health & Social Care integration. A copy of the current protocol is attached as evidence (Item 44).

The council has a centralised Register of Data Sharing Agreements.

Future Developments

Any future changes relating to this element will be reflected in joint protocols and shared with council staff as appropriate.

Assessment and Review

The protocols will continue to be developed as joint working with NHS through the Angus Health & Social Care Partnership progresses and will be formally reviewed on an annual basis.

Data sharing agreements will be managed more effectively through the centrally held Data Sharing Agreements Register as detailed in the Information Governance Improvement Plan.

Responsible Officer(s)

Jackie Buchanan, Director - Legal and Democratic
Angela Dunlop, Team Leader - Information Governance

Evidence of Compliance Element 14
