Good Afternoon

In relation to the letter received today I responded to your [REDACTED] at 00.25 this morning clearly confirming that as I was unwilling to remove my objection to this scheme as it was not fit for purpose and that in putting it in place Angus Council failed to act with due diligence and ensure that it met the individual needs of each community in which it was installed.

There is a significant risk to people in the village of Fowlis and I suspect other locations across Angus and this Scheme delivers no safe guards to pedestrians or other users. It blatantly fails to reduce speed lulling pedestrians and other road users into thinking they are safe and in a traffic calmed area.

I am happy to meet with representatives of Angus Council to look at this first hand however I do understand it is a bit late to start any form of engagement with the public at this eleventh hour
