

**ANGUS COUNCIL**

**DEVELOPMENT STANDARDS COMMITTEE – 13 FEBRUARY 2024**

**PROPOSAL OF APPLICATION NOTICE – SITE OF FORMER GASWORKS,  
CARSEVIEW ROAD, FORFAR  
GRID REF: 345932 : 751562**

**REPORT BY SERVICE LEADER – PLANNING & SUSTAINABLE GROWTH**

**1. ABSTRACT**

- 1.1 This report advises committee that a proposal of application notice (PAN) (ref: [23/00855/PAN](#)) has been submitted on behalf of Vital Energi Ltd for a major development involving a battery energy storage system with a capacity of up to 49.9MW and associated infrastructure on the Site Of Former Gasworks, Carseview Road, Forfar. Committee is invited to identify issues which it would like to see addressed in any planning application that may subsequently be submitted.

**2. RECOMMENDATION**

- 2.1 It is recommended that committee notes the key issues identified at this pre-application stage and advise of any other issues it considers should be addressed in the planning application that may subsequently be submitted.

**3. INTRODUCTION**

- 3.1 At its meeting on the 19 June 2014, council approved a guidance note on the role of Councillors in pre-application procedures in respect of national and major planning applications (report 275/14 refers). A key element of that guidance note requires officers to present a report to committee when a PAN is submitted. Such a report will set out what are considered to be the key considerations in the determination of any subsequent planning application and will allow Members the opportunity to identify any additional issues that they consider should be addressed when a planning application is submitted.
- 3.2 A PAN (ref: 23/00855PAN) has been submitted which indicates that an application for planning permission is to be submitted for the installation of 49.9MW battery energy storage system on the site of a former gasworks, Carseview Road, Forfar. The proposed development site would measure around 0.36 hectares and comprises of a former gasworks site. A plan showing the outline of the site on which the development is proposed is attached at Appendix 1.
- 3.3 The submitted PAN sets out the proposed pre-application consultation (PAC) activity which the applicant intends to undertake with the local community. The applicant has indicated that public exhibition events will be held at Forfar Athletic Football Club with associated publicity and notification. They also advise that correspondence regarding the proposal has been sent to the Royal Burgh of Forfar Community Council and to Forfar and District Ward Councillors.
- 3.4 The planning application cannot be submitted within the 12-week period following the submission of the PAN.

- 3.5 The results of the community consultation will be submitted with any subsequent major planning application in the form of a PAC Report as required by Development Management Regulations.

#### 4. DISCUSSION

- 4.1 Committee is aware that planning legislation requires decisions in respect of planning applications to be made in accordance with the development plan unless material considerations indicate otherwise. In this respect a number of policies in [National Planning Framework 4 \(NPF4\)](#) and in the [Angus Local Development Plan \(ALDP\)](#) will be relevant to the proposal.
- 4.2 NPF4 seeks to support development that helps to meet greenhouse gas emissions targets and it gives significant weight to the global climate emergency. There are specific policies in the development plan that relate to renewable and low carbon energy development (NPF4 Policy 11 and ALDP Policy PV9) and they provide a generally supportive policy framework. Those policies identify criteria that will be relevant to the assessment of proposals for renewable energy development. In addition, Angus Council has adopted [Renewable and Low Carbon Energy Development Supplementary Guidance](#). Those policies and associated documents would be relevant to the determination of any planning application.
- 4.3 Other policies in NPF4 and the ALDP will be relevant, including those that encourage, promote and facilitate development that addresses the global climate emergency and nature crisis; those that deal with the protection of amenity; safeguarding of the natural and built environment, including landscape and visual impact; access and informal recreation; essential infrastructure; and the water environment will be relevant to the determination of any application. National policy guidance and targets related to the generation of renewable and low carbon energy will also be relevant.
- 4.4 In these circumstances the key considerations in relation to the determination of a planning application will be whether the proposal complies with relevant development plan policies or whether there are other material considerations that justify a departure from those policies. In this respect the main considerations are likely to be the compatibility of the proposal with development plan policy and associated guidance having particular regard to the following matters: -
- Locational justification for the proposed development;
  - Landscape and visual Impact, including cumulative impact;
  - Impact on amenity, including residential and recreational amenity;
  - Ecological impact, including disturbance, displacement, habitat loss and/ or fragmentation and/ or opportunities for habitat improvement;
  - Built and cultural heritage impacts, including impacts on archaeological areas;
  - Impacts on infrastructure, including the public road network;
  - Impacts on the water environment, including flood risk;
  - Potential land contamination;
  - Electricity transmission arrangements;
  - Cumulative impacts;
  - Site decommissioning and restoration;
  - Contribution to energy generation targets and local socio-economic impact;
  - Safety issues, including potential fire risk;
  - Planning history and previous development approved to support energy generation.
  - Other material considerations including relevant local and national guidance on renewable and low carbon development, and representations in support or objection to the proposal that raise relevant planning considerations.

4.5 Whilst other issues may emerge through the publicity and consultation process associated with any planning application, the above matters are considered to represent the main issues that should be considered at the pre-application stage that are likely to be determining factors for any subsequent planning application. However, Members are invited to identify any additional matters that they would wish to see addressed.

## **5. OTHER IMPLICATIONS**

5.1 The human rights implications associated with the proposal will be considered in the determination of any subsequent major planning application for planning permission.

**NOTE:** No background papers, as defined by Section 50D of the Local Government (Scotland) Act 1973, (other than any containing confidential or exempt information) were relied on to any material extent in preparing the above report.
